Refreshments Served
\$5 donation at door

Clay and Pat Sutton, a husband and wife team, will take viewers on a fascinating journey exploring the elusive world of owls. Learn about the behavior, mating, and hunting skills of owls, the basics of owling, how to spot owls without disturbing them, and much more. Bring your binoculars so you can find some hidden owls in the program.

The Suttons are authors of many books on birds and nature. They are free-lance writers, naturalists, lecturers, tour leaders, and long-time instructors for the American Birding Association's Institute for Field Ornithology. They will bring copies of some of their books to be purchased and autographed.
